WORK EXPERIENCE

ConSoft | Software Engineer

August 2014 - April 2019 | Hannover

Promotion to Head of App Development: October 2017

- Conceptualized and realized native Apps and features using Java and Objective-C
- Led team of five developers developing and maintaining 20 mobile apps with 500.000+ installs
- Led the development for the 2019 Relaunch of the Wilo Assistant app
 - Mediated interests of shareholders, designers, and developers to ensure practicability of the project
 - Coordinated individual efforts to complete set milestones for both the Android and iOS app under time constraints
 - Successfully delivered the product in time for the targeted industry trade fair
- Enhanced App with augmented reality functionalities by integrating Unity and Cordova APIs in iOS and Android Apps
- Conceptualized and realized REST APIs and Databases using Node.js, PostgreSQL and SQLite
- Mentored multiple trainees during their apprenticeship

EDUCATION

MMBBS | Computer Science Expert

Software Development

2014 - Graduated June 2017 | Hannover

Grades:

- Software Development: excellent (93%)
- Final project (iOS app module to record room size measurements): excellent (94%)

Leibniz Universität | Computer Science

2011 - 2013 | Hannover

Helene Lange Schule | Abitur

Graduated May 2011 | Hannover

FREELANCE EXPERIENCE

Freelancer | Software Engineer

April 2019 - Present | Hannover | Taipei

Project: Advanced Wear Testing

Leibniz Universität Hannover - Institute of Dynamics and Vibration Research/Continental AG

Developed controlling scripts for test bench measuring tire wear in a dSPACE Environment using Python

- Improved maintainability and expandability of existing code base by decoupling UI and business logic
- Enabled the use of high frequency test profiles by improving script performance
- Integrated the project into a version control system (Git)

Project: Smart Home App

ConSoft GmbH

Development of IOT feature for native Android App

- Quickly integrated into an existing team of developers under a strict deadline
- Led the development of the App UI using Adobe XD prototypes as template
- Implemented bidirectional communications with IOT hardware using REST APIs

OTHERS

Cyber Days 2017 - Capture The Flag

April 2017 | Munich

Won 2nd prize competing against 60 finalists in a nationwide hacking/programming CTF Event organized by the german military

SKILLS

TECHNICAL SKILLS
